

It has been brought to my attention that you, the FCC, is planing to change the brodcasting of radio stations to LPFM format. I feel that this is an abrupt descision that is not fully thought through, and I feel that it will greatly interfere with a radio station that changes so many peoples lives. This station is Air 1, I believe that this station is a breath of fresh air that every community needs, and if you change the way the station is broadcast there is a large chance most communities will lose this station. I believe it is in the public interest for the format of broadcasting to stay the way it is. I also believe that, eventhough the FCC has no interest in christian radio, it has changed many peoples lives for the better and if you take that away you are taking away a chance for someone somewhere to come and know our Lord and Savior and change their life for the better. This is what I believe and I hope you would choose to save a life rather than change a system that works fine.
